The Yearling

Synopsis

Young Jody lives with his ma and pa on a farm in backwoods Florida. Life is hard there: cutting wood, planting fields, hauling water from a distant sinkhole. It is dangerous: wolves and bears roam the night. It's also lonely for a young boy. One spring day, Jody's pa kills a deer for meat. When Jody sees her spotted fawn in the brush, he convinces his father they should bring the fawn home. Thus begins a year when deer and boy are never far from each other. But the day will come when Jody must make a terrible choice between his beloved pet and his family's survival. *The Yearling*, published 50 years ago, is an enduring classic which won the Pulitzer Prize. As it follows Jody from childhood to the first steps of adulthood, it has touched the hearts of readers of all ages. Now, with Tom Stechschulte's warm narration, this moving story will delight an even wider audience.

Best Sellers Rank: #143 in Books > Audible Audiobooks > Children's Books > Classics #169 in Books > Audible Audiobooks > Children's Books > Animals #230 in Books > Teens > Literature & Fiction > Classics

Customer Reviews

It is not hard to see why this modern masterpiece was awarded the Pulitzer Prize in 1938. It was made into a classic movie starring Gregory Peck as Penny Baxter and was illustrated by the legendary N.C Wyeth. They would not have exhausted their immense talents on a mediocre book (as some of the reviews have expressed- were they reading the same book as me?). The story is beautifully crafted and it flows effortlessly. The homespun language is quaint and is perfect for the book (which is set in the late 1800s). The author knew the intricacies of nature in Florida and described it with exactness and beauty. There are many sections of the book that are filled with warm humor and lightheartedness. The deep closeness between the father and son is touching as

well as the love between the husband and wife. Life was a tough struggle then and it is brought out with great skill. Rawlings was a master of timing and descriptions. (For those high school students who were forced to read the book- read it again in ten years. I felt the same way about "To Kill A Mockingbird". In high school I hated it. Later in life- I loved it. Maturity adds a lot to any book). There is one aspect of the book that is a little hard to believe- grown men getting up in the middle of the night to play their music on guitars and so forth- stark naked- in front of a young neighbor- but that is only thing in the entire novel. N.C. Wyeth's illustrations are perfect for the story. His use of strong directional lighting is fabulous. I would recommend the Scribner Classic (hardcover) with his illustrations in it. Rawlings lived in the heart of the Florida woods in the winter time and was a keen observer of nature and men.

I remember checking *The Yearling* out of the library when I was 10 or 11. I read the first few pages and was so intimidated by the length of the novel that I returned it to the library two weeks later...unread. My loss. I just finished reading this book and it is a beautiful, poignant, rich story that I will hold in my heart forever. I appreciated Rawlings' detailed descriptions and her extensive character development. I felt like I was really there in the Florida scrub experiencing everything that Jody experienced. Jody's love for Flag is so lovely, touching, beautiful...and familiar. Have you ever had a pet whom you loved more than anyone else in the world and would do anything for? There is no other love like it...it is true devotion. The scene where Jody meets Flag is so enthralling that I wanted to read it over and over. I felt like I knew each character and I became so attached to Jody and Flag and their devoted friendship that I wept in more places than one. Although I think this is an excellent book for children and adults, I'm not sure that there are many teenagers who will appreciate it. It is a harsh story in places, but it is not so much the harshness that I'm talking about. This book is about a time when people were more at one with nature and life was simple and slow-moving. There are no explosions, no sex, no swearing and no gratuitous violence. I loved the novel for those reasons. To many young people, this may spell "boring". Although I would have loved this story at any time in my life, had I read it when I was a teenager, I would have never had the patience for the rich detail. Now, I savor it. I loved the story for its slow-moving, simplicity and detail and because it was a total break from the warp speed and superficiality of today.

An incomparable story of growth and survival in the most difficult conditions. *The Yearling*, set in the scrubland of northern Florida a couple of decades after the Civil War, is the story of the Baxter family: little "Penny" Baxter, the father, a saintly figure who is wise, understanding, kind, brave,

dutiful, stoic; Ory, the mother, whose essential goodness has been buried to some degree by endless toil and the death of several babies; and Jody, who is about 12 when the story begins, a good-natured sprite for whom nature is benevolent and everything is to be explored. The Baxters live some 15 miles from the nearest town and four miles from their nearest neighbors, the Forresters, a family of massive sons who are variously good hearted and murderous drunks. In this environment, the little Baxter family scratches out its existence. Two themes predominate: the loss of childhood innocence and Implacable Nature. The latter is depicted in a variety of ways: a legendary mauling bear that is seemingly impossible to kill; a pack of hungry wolves several dozen strong; a flood that destroys everything in its path and leaves the plague in its wake; a terrible poisonous snake that threatens the life of one of the characters. In this unforgiving environment, Penny forges ahead at all times, hunting and farming to provide for his little brood, rarely at a loss despite the continual setbacks that afflict "Baxter's Island," the small territory that the family owns. It's not all harshness, however. Moments of beauty break through at intervals, particularly when father and son are off on a leisurely hunt. There is often a great reverence shown for flowers, trees, waterways, birds, animals, and the landscape as a whole.
