## Customer Reviews

My daughter switched to Faber's Level 1 books after starting out in Alfred's. She has progressed quickly in the Faber books and they seem to be more of a "click" to her. She's now entering 3A and is enjoying the new books immensely. We really appreciate the variety available at each level, including Popular Repertoire and Christmas songs. The Faber Theory is also more interesting than Notespeller, which is what she used instead for a couple years.

I used this book when I was learning piano in high school as part of the series. Our piano class was very self directed and I think that this book was perfect for that in that the arrangements made sense and were easy to understand, the book offers a lot of tips and extra guidance on top of the sheet music and the songs are fun and engaging. I highly recommend this book for someone who has learned and practiced piano some and is ready for something a bit more challenging without jumping into the really complicated stuff. Great book!

Arrived on time and in perfect condition. Great series for piano students. I have used these from the beginning with my kids and find them very easy to follow. They have very nice songs, and have a diverse collection of music.

We ordered this because my son's music teacher asked us to. However, having seen other piano instructional books, I have to say that I do prefer the Piano Adventures series. The illustrations are colorful and interesting.

The Piano Adventures are my favorite teaching books for sure. Their songs have a lot of variety and they are fun to play. The kids don't complain that they are stupid or hokey. I recommend this series.

My daughter has used this series since she started piano lessons several years ago and has made great progress

These are nice instruction books for Piano lessons. My girls have used these books from the beginning and are therefore used to the teaching style.

Great book for the learning student. Recommended by our piano teacher, has songs my daughter enjoys.
