Jack Canfield and Dr. Peter Chee have written a very valuable book, *Coaching for Breakthrough Success*. This book is written as a complete guide for those who want to improve their coaching skills or for anyone wanting to become a coach. This book is filled with highly valuable and actionable information. In my opinion, it contains so much information that it would be very difficult to digest it all in one reading. I think the way to use this book is to read it through and then go back and study each section as you are actively working to implement the ideas and concepts in the book. The book is divided into three parts: Part one covers The Coaching Principles 1) The coaching spirit 2) Relationship and trust 3) Asking questions and curiosity 4) Listening and intuition 5) Feedback and awareness 6) Suggestions and simplification 7) Goals and action plans and 8) Accountability and accomplishments. There are a total of 30 principles covered in the 8 chapters. There is a separate chapter devoted to each coaching principle. The authors give the theory, explain how it is used in coaching and where appropriate, give examples from coaching sessions. Part two covers the Situational Coaching Model. There are six paradigms covered in the SCM, they are: Goals, Exploration, Analysis, Releasing, Decision and Action. While the SCM is presented in a sequential order, in actual coaching you could well shift back and forth between the various paradigms. The authors give examples of when you would want to shift between the various paradigms.
