45 YEARS OF TRUE RAILROAD STORIES: Told By Engineer John Cockrell

Synopsis

45 Years of True Railroad Stories places you in veteran SP/UP Engineer John Cockrell's seat to experience exactly what he did during his 45 year career as a fireman, switchman, and engineer working for one of the largest railroads and most beloved industries of all time. For over three years, this husband and wife team worked together to document John's stories. He told them as Sheri typed, bringing them closer together. The book contains over 65 stories of real-life trip experiences starting at the Southern Pacific LA Division when John was only 18 years old, and continuing to include trips over Donner Summit, the longest continuous grade from summit to end on the Western side, in the United States ... and much more! This book is meant for sharing. Not only with you, dear reader, but with generations to come. Enjoy the journey! Customer Reviews

As a railfan and retired 31-year employee of Union Pacific Railroad I loved the book. I am very familiar with the places he worked and easily fell into his easy and thoughtful tales about the railroad. Too many railroad books are childish or vindictive. John Bromley

As a long time Southern Pacific railfan I absolutely loved it. I chanced upon a review of this book in Trainline magazine and knew I had to buy it. The author puts you in the right seat of a locomotive and shows you exactly how engineers perform their craft of getting modern trains from origin to destination. The book is a eclectic collection of true-to-life railroad short stories all experienced by the co-author, long time SP/UP engineer John Cockrell as told to his wife and co-author Sheri Cockrell. The stories are complete with authentic railroad vernacular which is defined in an excellent glossary. The time period of these stories begins just as steam was on its last gasp on the SP and first generation diesels were taking over and extends to the 2000s as SP and UP were merging. This is a great read, written by a railroader with the intent of giving us a detailed glimpse into his world. With this book he succeeds magnificently.

An interesting collection. It was special interest to myself as an ex railway worker to compare many similarities and differences with procedures that applied to the New Zealand system during the same times.

Great book wished it was a 1000 pages long grew up in redding my dad was a signal maintainer for s p in redding a lot of stories in book take place in my dad's district

This is a great book for any railfan.

great book for railroad life
